

(a) System Pareto frontier
(curves for $\theta \in [0.1, 1]$)

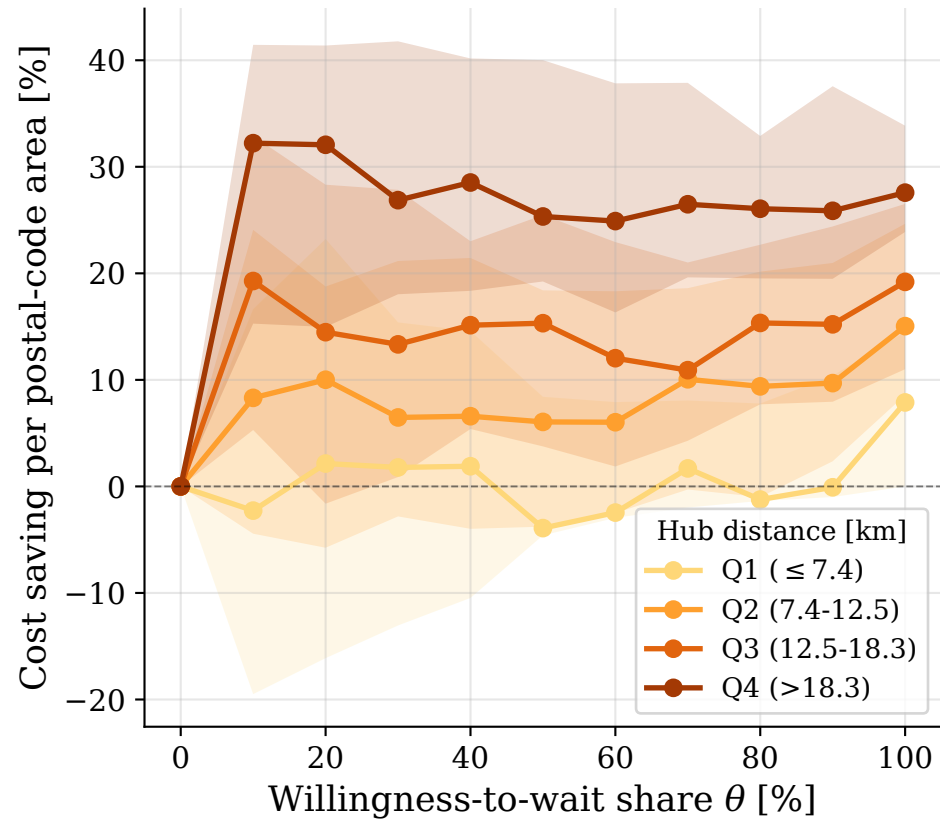

(b) Saving by carrier type at operator-optimal P^*
(line = median, band = 25-75th percentile)

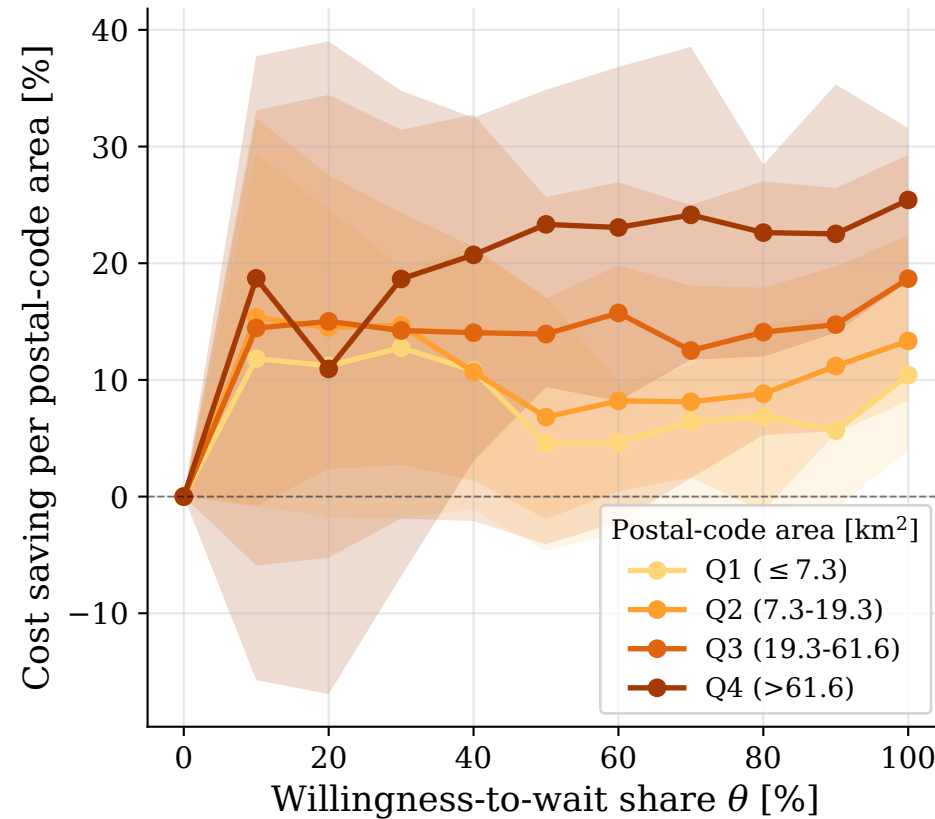

(c) Saving by region type at operator-optimal P^*
(line = median, band = 25-75th percentile)

(d) Saving by hub distance at operator-optimal P^*
(line = median, band = 25-75th percentile)

(e) Saving by postal-code area size at operator-optimal P^*
(line = median, band = 25-75th percentile)

(f) Saving by parcels per drop-site at operator-optimal P^*
(line = median, band = 25-75th percentile)
